

MANUAL GLUING MACHINES

STANDARD – DIN A4

SONDER

IMBALLAGGI

STANDARD (135 mm.)

The STANDARD allows the quick gluing of labels, addresses etc. up to an opening width of 135 mm. Simply run the item which is to be glued over the fabric finish roll. The film of glue, which is constantly replenished as the rollers turn, enables you to obtain a perfect gluing of the whole surface. Built in plastic and stainless steel. For bigger widths we recommend the DIN A/4a (210 mm) e SONDER (280 e 360 mm) with same functional features and built in nickel-chromium steel.

Useful width (STANDARD) : mm. 135
Dimensions mm.170x180x60
Weight Kg. 0,800

DINA A4 (210 mm.)
